Nonprofit
Get Connected to Engage Constituents and Donors

"The user interface is amazing, since it eliminates the complexity of establishing connections with a wide variety of back-end platforms."

– GARETH SUMMERS, IT SYSTEMS & MI MANAGER, WATERAID

Nonprofits often have to do big things with small budgets. Any extra time spent on IT issues takes time away from working directly with constituents. Integration can help nonprofits eliminate manual work, automate operations, improve data quality, and enhance their outreach efforts with appropriate personalization.

Jitterbit Harmony is a smarter approach to integration, offering a single cloud platform that includes everything needed to connect the various applications that nonprofits use to achieve their mission, without writing any code. From donor and program management to marketing automation to financial reporting, Harmony can connect applications and systems to make operations easier for nonprofits, so they can focus on what really matters: helping constituents.

By connecting applications, nonprofits can save substantial time and money, and gain the ability to apply their expertise rather than dealing with disconnected data and manual processes.

NONPROFIT BENEFITS

- Get a 360-degree view of grants, volunteer programs, gifting campaigns and more
- Create a single source of truth for donor information for fundraising planning
- Eliminate manual work and achieve operational efficiencies
- Streamline reporting and analytics to validate program effectiveness
- Engage donors and constituents more effectively with accurate information

BENEFITS OF CONNECTIVITY

- Gain real-time visibility into all aspects of your organization
- Save time and empower employees to focus on their core jobs
- Ensure that data is accurate and synchronized everywhere
- Automate processes and streamline your fundraising operations
- Enable real-time donor self-service
- Engage with donors with customized messaging
- Realize return on investment quickly, with a low total cost of ownership

SUCCESS STORY

Wateraid provides clean water and effective sanitation around the world. This can be done by connecting systems such as Salesforce, Microsoft Dynamics CRM, Yammer, and Power BI. This enables the organization to be more efficient and provides a complete view of financials which is critical to yearly financial planning and program management. In addition, integrating social media, program documentation, and analytics allows WaterAid to intelligently deliver necessary programs in an efficient manner.

JITTERBIT'S SALESFORCE CONNECTOR:

Natively connect any cloud or on-premises application or data source to Salesforce. Capabilities of the connector include:

✔ Access to all objects in the Salesforce API as outlined in the Salesforce Developer Documentation

✔ Support for the following methods to all available objects: Query, Insert, Update, Upsert, Delete, and Hard Delete

✔ Bulk support with the ability to specify batch sizes

✔ Predefined functions and variables specific to Salesforce

✔ Support for non-bulk PK chunking

✔ Configurable retry and time-out settings

Use the Salesforce Connector to automate your organization's processes and integrate Salesforce with your other critical systems. Popular use cases include, but are not limited to:

✔ Synchronize key constituent data in your ERP, Services, and Marketing systems for a 360° view of the customer in Salesforce

✔ Combine Salesforce data with your other data for enhanced analytics and business intelligence

✔ Automate notifications via your internal messaging and chat tools based on changes in Salesforce

✔ Provide real-time updates of critical donor and project information to and from Salesforce

The Jitterbit API Integration Platform, through an intuitive interface, enables companies to design integrations to thousands of applications and data sources as well as create and publish APIs from existing systems to automate critical business processes.
